🇳🇬 Nigerian 🏹 Male

Resourceful and creative professional with a strong background in web frontend development (HTML, CSS, JavaScript, React) and experience in data entry and reconciliation. Known for delivering clean, responsive designs and ensuring accuracy with large datasets. Adaptable and tech-savvy, with excellent communication, time management, and organizational skills—making me a great fit for virtual assistant roles, freelance projects, and remote work environments. Confident in handling diverse tasks such as content updates, admin support, research, design collaboration, and client coordination. Eager to contribute to creative, tech, or business teams that value efficiency, innovation, and reliability. Always ready to take on a new challenge,task or job

Experience

RuthandRoots	02/2026 – 03/2026 Lagos, Nigeria
- Delivered exceptional customer service by promptly responding to inquiries via phone, email, and WhatsApp regarding herbal remedies, fibroid solutions, fertility support, and nutrition plans. - Provided accurate product information and guidance to clients, helping them understand treatment options and make informed decisions on natural health products. - Managed customer complaints and concerns effectively, resolving issues with empathy and professionalism to ensure high satisfaction and repeat business. - Processed orders, follow-ups, and consultations while maintaining detailed customer records in the company’s database. - Built and maintained strong client relationships by offering personalized support, tracking progress, and contributing to positive feedback and testimonials.	
Frontend Development Intern, Semicolon Labs	01/2024 – 09/2024 Nigeria
Semicolon Lab offers web development, IT consulting, test automation, machine learning, Artificial intelligence, and app development. - Created interactive user interfaces using React and Redux, enhancing the user experience and contributing to a substantial increase in client engagement for multiple web applications. - Collaborated with design teams to implement responsive web designs using HTML, CSS, and JavaScript, ensuring seamless functionality across various devices and platforms. - Developed and tested front-end components using JavaScript and TypeScript, ensuring enhanced user experience and cross-browser compatibility across multiple projects. - Integrated API endpoints with front-end applications, streamlining data retrieval processes and improving interface responsiveness, thereby enhancing overall application performance. - Assisted in the deployment of web applications by debugging and refining UI components, resulting in smoother user interactions and reducing load times.	

Data Entry/Data Reconciliation Officer, Halogen Group

09/2022 – 02/2023

Halden Group is a software solution and consulting services company.

Lagos, Nigeria

- Standardized and reconciled data sets across multiple platforms, ensuring data integrity and accuracy for critical business reports, and significantly reducing discrepancies in financial statements.
- Centralized disparate data sources, facilitating seamless integration and improving data processing efficiency for daily operations.
- Streamlined data validation processes, enhancing the speed and accuracy of data entry tasks while minimizing errors across various departments.
- Accurately entered and updated large volumes of data into Microsoft Excel spreadsheets and internal databases, ensuring a 99%+ accuracy rate.
- Designed and generated professional certificates using Microsoft PowerPoint templates, customizing names, dates, and achievements for training sessions, events, or staff recognition.
